

ABSTRACT OF THE DISCLOSURE

A mailbox assembly includes a housing including a bottom wall, a
5 first side wall, a second side wall, and a back wall. A front wall is
hingedly coupled to the housing and defines a first door for selectively
opening or closing the housing. A top wall is attached to the first and
second side walls. The top wall is substantially transparent. A window is
positioned in the first side wall and comprises a substantially transparent
10 material. The window has a pair of apertures extending therethrough.
Each of a pair of gloves has a wrist portion and a hand portion. Each of the
wrist portions is attached to and extending along a perimeter edge of one
of the apertures such that each of the gloves extends into housing.
